**UNIT PRICE: \$2,419.00**

**System Description:** This projector provides the option of programming up to 33 total charts in any order you wish, the CP-770 allows you to conduct an examination in a darkened room simply by pressing one button on the remote control each time you want to move to the next chart. While allowing you to pre-program a sequence of charts in advance, the CP-770's random access capability gives you the option of performing an examination by randomly selecting the charts you want while you proceed with the refraction. The sophisticated masking features allow you to isolate and maneuver individual horizontal or vertical lines and individual letters, numbers and characters. You also have your choice of special polarized tests as well as a Red/Green slide and a Red/Green filter. The standard selection of 33 charts includes a wide variety of Snellen, illiterate E's, numbers, pediatric, and special testing charts. To eliminate patient memorization, the CP-770 includes 10 selectable 20/20 lines, and additional 20/15 and 20/10 lines for the more discriminating refractive surgery patients.

The unit incorporates a maintenance free LED illumination system.

- Features:**
- 11 Special testing charts include
    - a. Muscle balance test
    - b. Minute stereo test to quantify distance depth perception
    - c. Coincidence test
    - d. Worth four-dot test
    - e. Fixation spot test
    - f. Snellen letters with red / green filter
    - g. Cross-cylinder test
    - h. Vertical letters
    - i. Horizontal letters
    - j. Binocular refractive balance test
    - k. ETDRS "LogMar" charts
  - 9 Snellen charts (five individual 20/20 lines)
  - 5 Numbers charts (two individual 20/20 lines)
  - 4 Illiterate E charts (two individual 20/20 lines)
  - 3 Children's charts (one 20/20 line)
  - Masking buttons
  - Red / Green filter
